GENERAL SURGICAL INSTRUMENTS
...the most popular patterns!
Miltex recognizes and meets a variety of clinical needs in the careful construction of our Surgical Scissors. Whether Dissecting, Cutting Tissue, Suture or Dressing material or performing any number of important functions, our finely crafted scissors perform at a level equal to the surgical task.

FORCEPS and RING-HANDLE FORCEPS

Miltex Forceps are for the most delicate procedural requirements as well as routine yet important surgical needs. It may be instrumentation for exacting Plastic Surgery with just the right handle or a simple “pick-up”. Miltex is able to fulfill either demand with just the right instrument.

HEMOSTATS

Miltex uses not only the very best material but the finest craftsmanship to build into our instruments the surgical “feel” that is essential to achieve ideal hemostasis. Our hemostatic forceps are distinguished from all others by an unrelenting and complete commitment to creating an instrument which surpasses the most critical evaluation.

NEEDLE HOLDERS

A close examination of Miltex Needle Holders, either Standard or Tungsten Carbide, will reveal meticulously crafted surgical tools that will perform precisely as intended. Smoothly beveled box locks and jaw edges protect delicate suture material from snags or cutting. The jaw surface is milled to ensure a secure grasp and to prevent needle slippage or rotation. They are, very simply, the best.
